PLACEMENT INFORMATION

Primary Field	Macroeconomics, Growth & Development, Structural Change
Secondary Fields	Human Capital, Innovation
Expected Completion	March 2027
Placement Officers	Dr. Gianni de Fraja, Professor of Economics, gianni.defraja@nottingham.ac.uk Dr. Marit Hinnosaar, Associate Professor, marit.hinnosaar@nottingham.ac.uk
Placement Support	Dr. Natalia Bas, Senior Operations Officer, natalia.bas@nottingham.ac.uk

EDUCATION

PhD Economics [Candidate] <i>University of Nottingham, UK</i> Advisors: Dr. Markus Eberhardt & Dr. Juan I. Vizcaino ESRC +3.5 Doctoral Scholarship Award	2022-Present
MRes Economics [Distinction - Top of Class] <i>University of Nottingham, UK</i> School of Economics Scholarship Award	2021-2022
MSc Economics for Development [Merit] <i>University of Oxford, UK</i>	2017-2018
BA (Hons) International Development [First Class] <i>King's College London, UK</i>	2014-2017

JOB MARKET PAPER

Early Childhood Development and Structural Change

This paper presents a theory on how early childhood development shapes structural change. I begin by documenting two novel cross-country facts: parental childcare time allocation towards young children (0-4 year-olds) and early childhood human capital outcomes both rise with economic development. These coincide with the rise in the high-skill services employment share with development. I then construct a heterogeneous agents general equilibrium model to quantify how early childhood development amplifies structural change. The model integrates a multi-stage human capital production function and endogenous labor supply into a standard multi-sector growth model with non-homothetic preferences and unbalanced sectoral TFP growth. The model replicates the patterns of time use, structural change and the skill distribution in the postwar United States. I show that the rise in parental time allocated to the childcare of young children can explain 64.3% of US structural change to high-skill services in partial equilibrium and 35.0% in general equilibrium. The results highlight the role of early childhood development as an amplifier of human capital quality.
